Summary

Software Engineer with 4+ years of experience. I own complex technical projects, end-to-end. Experienced in scalable system architecture, mentoring junior engineers, and shipping high-quality maintainable code.

Skills

Frontend: **TypeScript/ES6, ReactJS, React Native, NextJS, Redux, GatsbyJS, WebSockets**

Backend: **Ruby on Rails, Sidekiq, Node.js, Python (Django), GraphQL, Redis, PostgreSQL, MongoDB, RPC, Database indexing**

Cloud & DevOps: **AWS (Lambda, S3, SES, SQS), GCP (CloudSQL), Docker, CI/CD (Jenkins, Bitbucket Pipelines)**

Methodologies & Tools: **Agile, Scrum, JIRA, Git, TDD, Event-Driven Architecture, Micro-Frontend, CQRS, Microservices**

Work Experience

GoComet

Bangalore, India

SENIOR SOFTWARE ENGINEER (PROMOTED FROM SDE)

2021 - Present

- Led and orchestrated end-to-end projects for key enterprise clients (Unilever, Vita Coco, Transocean), directly **securing over \$700K** in ARR.
- Architected and scaled the core workflow engine from scratch to support over **20+ enterprise clients**, owning the technical design process through HLDs and LLDs.
- **Increased and Enforced unit test coverage to 86%** of the codebase through ownership & effective delegation.
- Optimized critical platform APIs and database queries using APMs and advanced indexing, slashing a key API's response time from **over 60 seconds to under 1 second**.
- **Provided technical leadership to the team of 5 junior engineers**, increasing sprint completion rate by **25%** through agile leadership and rigorous code reviews. Resulting in promotion of two engineers and guiding two interns to full-time offers.
- **Engineered** a highly performant Table View feature with server-side filtering and aggregation, with infinite scrolling, **improving** load times for large datasets by over **3x**.
- **Introduced and enforced** agile methodologies and process improvements across multiple teams, **reducing** tech debt and ensuring SLA compliance for enterprise clients.

SDE

- **Automated** the customer onboarding process via Stripe integration, **eliminating 100%** of manual activation tasks and **reducing** new client setup time from days to minutes.
- **Developed a core, user-facing Workflow Editor**, implementing complex logic & algorithms to enable robust, customizable client workflows.
- **Expanded platform capabilities by building**
 1. SMS notification system using AWS SNS & SQS.
 2. AWS Lambda Functions for Email Receiving/Forwarding.
 3. Migration to Next.js middleware from a custom server.

Slick Technologies Pvt. Ltd.

Remote

SOFTWARE DEVELOPMENT INTERN

2020

- **Created codebase and guidelines** from scratch for a SPA for Dynamic Forms and collaboration while creating performant and accessible React components.
- **Maintained a Shopify store** using Liquid and JQuery to implement plugins like Cross Sell and Upsell.
- **Maintained React Native app** for e-commerce store.

Honors & Achievements

2024 Peer Appreciation Award, GoComet

Bengaluru

2023 Productivity Powerhouse, GoComet

Bengaluru

2021 Peer Award, GoComet

Bengaluru

2018 27th Rank, CodeChef API Hackathon 2018

Ahmedabad, India

Projects

WebSearchScrapper

 GITHUB REPOSITORY

2024

- Integrated web search with ChatGPT APIs to analyze factors affecting port delays. Built as a Node.js service designed for a hackathon.

bDownload

 GITHUB REPOSITORY

2019

- A batch downloader cli made in NodeJS. Download using HTTP or curl, Output folder selection, Batch downloading.

rhythmix

 GITHUB REPOSITORY - DEMO

2019

- A polyrhythm trainer for musicians built with React.js. Solved complex state management challenges for synchronizing multiple audio patterns using the Web Audio API.

Education

Silver Oak University

Ahmedabad, Gujarat, India

B.E. IN COMPUTER ENGINEERING

2017 - 2021

- 8.54 CGPA
